

Dictation Server for Medikin 3.0

Medikin is proud to announce its new dictation server as part of the rollout of The Medikin Online 3.0 system. The code is entirely rewritten based on the latest versions of Linux, Asterisk, MySQL and PHP.

Benefits of the New Dictation Server:

- More flexible and customizable
- Better redundancy, stability and security
- Provisioning dedicated toll-free numbers per MTSO, or even per hospital or clinic

Enhances security and decreases likelihood of misplaced files

Enables provisioning of special login IDs that were previously unavailable or taken

- Provisioning custom branded outbound welcome greetings per toll-free
- Quicker turnaround time to add new accounts
- Better and faster debug tools for any issues such as misplaced files
- Provisioning logins and passwords of arbitrary length
- Optional provisioning of dedicated dictation servers at client locations
