

Medikin Online 3.0

Completely Re-engineered Software

- The programmatic code for Medikin 3.0 has been re-engineered from the ground up
- The 3.0 code architecture is completely modular which makes it better in many ways

Medikin 3.0 is faster

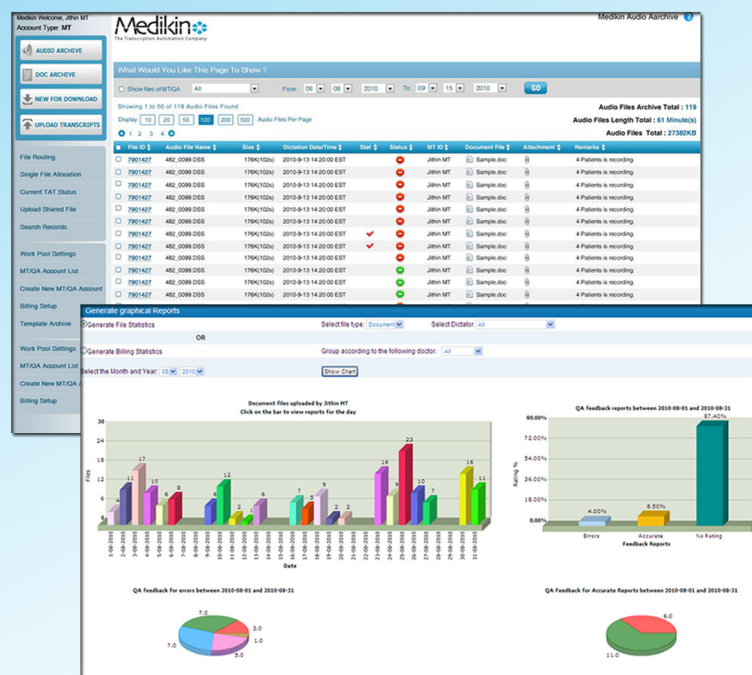

- Database queries have been optimized for faster search and navigation
- The number of records per page is user selectable which can reduce the time to display results

Medikin 3.0 is more secure

- The new code has more advanced security policies
- Administrators can restrict user login by IP address

Medikin 3.0 is more friendly

- The system has an updated look and supports enhanced sorting, alignment, etc.
- Documents can be converted to PDF
- Graphical charts are available for all user types
- Compatible with IE, Firefox, Chrome, Safari browsers, except for the MTP (IE only)

Medikin Typing Platform (MTP)

- Transcribe and edit documents directly in the browser
- Documents are saved online only, enhancing HIPAA compliance
- Searchable patient demographics fields are enabled
- Templates can be created with any subset of the available demographic data fields
- The MTP is optional. Of course we continue to support uploading Word documents in 3.0

Graphical Charts

- Each user type - MT, QA1, QA2, Doctor, MRM, MTAdmin - can access context relevant charts
- Charts have a user-friendly look yet provide useful information with numerical values as well
- Data that is charted includes: documents uploaded, feedback reports, lines per day, audio files per doctor, etc.

Smartphone Integration

- Blackberry and iPhone app integration complete
- Android app pending
